

Security through Diversity

Afilias' Managed DNS Service provides you with a world-class solution and a 100% uptime guarantee to ensure that traffic to your site resolves. The Afilias mesh network is built on a solid Afilias owned and operated foundation with global locations across five continents, guaranteeing redundancy and reliability. This state-of-the-art network is further strengthened by supplemental external DNS support for additional peace of mind.

Outsourcing your DNS

You want your Web site to resolve--period. Outsourcing your DNS minimizes expenses, time and capital requirements to your company while ensuring your DNS is managed on stable platforms by experts in the field. Our competitive pricing and superior service ensure that you get the best reliability with 100% uptime guaranteed.

Afilias Knows DNS

Afilias' reputation speaks for itself. Today, we support the resolution of more than 14 million domain names across 15 top-level domains, including .info and .org. Afilias, an ICANN authorized registry operator, has already been selected as a provider of choice by companies such as the Public Interest Registry (.org), .mobi (and its investors such as Microsoft, Google, and T-mobile), and others to provide Internet infrastructure and resolution services.

Diverse Architecture

Our methodology ensures the security of your site through a diverse architecture that no other service provider can replicate. Afilias' DNS network is a multi-layered, tiered design which integrates diversity through multiple hardware and software solutions, multiple bandwidth providers, and numerous geographic locations to avoid any single points of failure.

Through this diversity, Afilias is able to ensure that its DNS network provides state-of-the-art defenses against even the most malicious attacks.

Key Features

Data Management Portal

Our Web-based interface allows you to view and report on your traffic and query volume. It also provides for group management for large portfolios of domains, as well as cutting edge security features, all available at your fingertips.

Reporting Suite:

- Advanced real-time reports including:
- Graphical analysis
 - Hundreds of reporting configuration
 - Standard daily, weekly and monthly views

Peace of Mind

- Protection against overage fees.

Enhanced Security & Alert Services

- Strong password security with dual factor authentication
- Out-of-band security alerts
- Access control by IP location

Account Management:

- Bulk import
- Domain folders & user groups
